## **!!!HOT Infrared Sampling Accessories!!!**

ATR Sampling Accessories successfully replace constant path transmission cells and salt plates used for analyses of liquid and semi-liquid materials. Horizontal ATR can be used to analyze films, pastes, solids, and fine powders. Thanks to the reproducible effective path length, it is well suited for both, qualitative and quantitative applications. Single and multiple reflection products are available.

### **The ATR Product Line Includes:**

- **Micro ATR** - as part of the  $\mu$ Max™ Infrared **Microscope** system. See inside for more details.
- **Multiple Reflection ATR** - Provides Maximum Sensitivity and Highly Versatile Sampling with up to 17 reflections.
- **MIRacle™ ATR** - Fast and Easy Sampling with single or three reflection options. Sample spot size as small as 1.8 mm.
- **Variable Angle ATR** - for depth penetration studies.

# Announcing the New $\mu$ Max IR Microscopes!

**New** easy to operate, high performance Infrared Microscopes including:

- Transmission
- Reflection
- Micro-ATR

... all for under \$20,000!

Entry-level models are available for under \$14,000!
